SUMMARY

I'm a full stack Web Developer leveraging a sales background who specializes in developing innovative solutions and maintaining an exceptional user experience. Recently earned a Certificate in Full Stack Web Development from Columbia University enhancing my skills in JavaScript, React & Nodejs. Recognized as an organized and adaptable critical thinker, I am dedicated to improve my expertise while embracing new challenges alongside an innovative team focused on coding accessible, human-centered products.

TECHNICAL SKILLS

- Languages: JavaScript, HTML, CSS, Python3
- Libraries & Frameworks: React, Redux, Gatsby, jQuery, Next.js, Node.js, Express, MongoDB, Mongoose, GraphQL, MySQL, Sequelize, Handlebars, EJS, Testing, Bootstrap, Material-UI
- Tools & Platforms: Git version control, Webpack, Netlify, Heroku, Marketo, MS Excel, Wordpress

PROJECTS

SLICK'S SLICES | Repo: GitHub | Live: Go to App   **April 2021**
- Summary: A responsive website for a local pizza shop focused on loading lightning-fast landing pages. Used Gatsby to deliver critical CSS to the front-end. Used Sanity.io as a headless CMS to deliver the data.
- Role: Sole Author
- Utilized: React, Gatsby, Relational Data, Scoped CSS, Headless CMS, Pagination, Formik

POKEDEX | Repo: GitHub | Live: Go to App   **March 2021**
- Summary: A virtual Pokedex with a sleek design that catalogues and provides information regarding the various species of Pokemon featured in the Pokemon video game, anime and manga series.
- Role: Sole Author
- Utilized: JavaScript, React, React-Router, Bootstrap

DEVSYNC | Repo: GitHub | Live: Go to App   **April 2021**
- Summary: Developed a full-stack MERN app to help facilitate the job hunt for developers around the world.
- Used Redux to manage the global state of the application, JSON Web Tokens to authenticate users and localStorage to help store the token and send for validation when making a request.
- Role: Backend, Express server/routes, Mongoose queries, serve data to front-end in React.
- Utilized: React, Redux, Node.js, Express, MongoDB, Mongoose, Material-UI

EXPERIENCE

BOND NY

Residential Real Estate Broker   **June 2015 – Present**
- Proven ability to increase agency revenue by additional $1MM year-over-year, while closing contracts and acquiring clients through Email Marketing, Digital Marketing, and customer relations.
- Provide competitive analysis and industry benchmarking of NY Real Estate Market in order to properly position the firm's strategies against competitors, while increasing earnings and gaining market share.
- Managed and trained junior agents in order to aid in the development of their sales presence. Won the Top Producers Silver Medal in 2018 & 2019 for excellence in revenue gain & lead conversion.
